

### Lo-Fi Prototype for shopping cart page:

### Hi-Fi Prototype for shopping cart page:

The check-out button has now been moved to the right for better visual balance and consistency with overall layout. Removed the column names (“product”, “quantity”) for better viewing experience and clear representation of products.

#### **NOTE:**

1. Please select **Round Pillow** for style.
2. The shopping cart is not a “whole” new page, instead it is a floating element. To access, please go to the **round pillow customization** page, and click on the **shopping bag icon** at the upper right corner. Still static, since it is just a prototype.
